SUMMARY

Senior Full Stack Developer with 7+ years of experience building high-performance web applications, scalable systems, and enterprise-level digital solutions. Experienced in frontend and backend development using JavaScript, TypeScript, Node.js, React, Next.js, PHP, and WordPress, with strong expertise in API integrations, automation workflows, custom platform development, and production-ready systems.

Skilled in developing custom themes, plugins, backend services, and modern web solutions with a strong focus on performance, maintainability, security, and real-world business impact. Proven track record of improving website performance, streamlining operational workflows, and recovering critical systems during security incidents while delivering reliable solutions across fast-paced environments.

EXPERIENCE

Full Stack Software Engineer

Code Nation

08/2024 Gainesville, United States

- Founded Code Nation, delivering scalable full-stack web solutions with expertise in React, Next.js, Node.js, and WordPress, including custom applications, themes, and plugins.
- Performed strong plan for API design to ingest and deliver leads with OAuth security validation rules, along with rate limiting to secure API calls from DDOS attacks.
- Used MySQL (SQL Queries) as RDBMS to ensure application data stays intact and error free with relational model with the use of primary and foreign key checks.
- Created responsive, component-driven frontends embedded with secure backend systems (Node.js/PHP, MySQL) and third-party APIs, including payment gateways.
- Led end-to-end development from requirements to deployment and maintenance, optimizing performance, security, SEO, and scalability through clean, maintainable architecture.
- Technical Decision-Making power to deliver results and getting applications by 60% increase in website performance and stability.
- Fine-tuned team collaboration by 35% using communication tools like Zoom, Slack, and Gmail for daily updates.

Chief Technology Officer (CTO)

JapRox

10/2016 Manchester, United Kingdom

- Led technology strategy and full-stack development, driving system architecture and product roadmap decisions.
- Built and maintained scalable web applications using React, Next.js, Node.js, and WordPress, integrating modern frontends with secure backend systems (Node.js/PHP, MySQL).
- Managed the full SDLC from requirements through deployment and maintenance, while optimizing performance, SEO, security, and scalability.
- Integrated third-party APIs, payment gateways, and CRM integrations, and mentored developers to uphold engineering best practices and delivery standards.

PROJECTS

Vistex Inc

Remote

www.vistex.com

Enterprise-grade web platform development focused on Full-stack development

- Upgraded web platform scalability and performance through full-stack development and optimization.
- Worked across frontend and backend systems using JavaScript, Node.js, REST APIs, and database-driven workflows.
- Built reusable frontend components, integrations, and API-driven functionality.
- Boosted responsiveness, maintainability, caching, and overall platform performance.
- Contributed to the development and maintenance of a large-scale multilingual enterprise platform serving multiple industries and global audiences.
- Improved website performance, responsiveness, and maintainability through caching strategies and frontend optimization best practices.
- Launched 7 enterprise grade eBooks focused on React.js, Next.js, Vercel and responsive web design. **(Happy to share URLs and present my code during interview).**

PROJECTS

Top Dog Law

Remote

www.topdoglaw.com

- Established and streamlined a high-performance web platform for a law firm, enhancing digital presence through scalable full-stack solutions using HTML, CSS, JS, PHP, MySQL, and WordPress.
- Built custom templates, and dynamic features, implementing structured data models (custom post types and taxonomies) for efficient content management without affecting SEO efforts and rankings.
 - Converted Figma design into production ready responsive web pages without affecting 1% of design hierarchy.
 - Delivered responsive, mobile-first interfaces with modern frontend technologies and improved performance, SEO, and scalability through advanced optimization and caching strategies.

Top Class Actions

Remote

www.topclassactions.com

- Full Stack Web Developer specializing in high-traffic, scalable web applications using React, Next.js, Node.js, and WordPress.
- Contributed to the development and optimization of a large-scale legal platform, leading full-stack feature development across frontend and backend to improve user engagement.
 - Modeled and optimized RESTful API integrations with internal systems and third-party services, while enhancing performance through advanced caching and efficient data handling.
 - Built automated workflows, integrated secure payment systems, and configured robust security practices to protect sensitive data.

Legafi

Remote

www.legafi.com

- Legal technology platform enhancing access to legal resources
- Resulted in a 15% increase in user engagement by developing a scalable, enhanced WordPress platform for legal resources.
 - Built custom themes and plugins to manage legal guides and case updates efficiently.
 - Delivered responsive design to ensure usability across devices.
 - Strengthened performance and applied technical SEO best practices for organic visibility.

Xero Shoes

Remote

www.xeroshoes.com

- E-commerce platform focusing on sustainable products
- Scaled and upgraded a high-traffic WooCommerce platform.
 - Improved checkout speed by 68% and boosted sales by integrating key WooCommerce features.
 - Implemented extensive API integrations for inventory and order fulfillment.

Cork Tree Creative

Remote

www.corktreecreative.com

- Creative agency focusing on custom web solutions
- Designed and built a modern WordPress platform for Cork Tree Creative.
 - Implemented flexible content architecture for showcasing services.
 - Refactored performance and applied technical SEO best practices.

JES Holdings

Remote

www.jesholdings.com

- Real estate company focusing on investor communications
- Resulted in a 50% increase in property listings by developing a scalable WordPress platform.
 - Elevated application performance, resulting in 15% increased user engagement, by optimizing SEO and building responsive interfaces.

Rev And Torque

Gainesville, United States

www.revandtorque.com

- Automotive publishing platform focused on vehicle content
- Designed and developed a scalable WordPress platform for high-volume automotive publishing.
 - Increased content organization efficiency by 30% by implementing custom post types for structured content management.
 - Enhanced site performance through caching strategies and database optimization.
